Warnings and Advice

This source has been flagged as unreliable. When reading articles from this source:

- Be skeptical of bold claims without evidence.
- Check if scientific claims are backed by recognized medical institutions.
- Be aware of emotionally charged language meant to provoke fear or outrage.

The article content has been flagged as potentially misleading. Watch out for:

- Exaggerated claims or miracle cures.
- Misrepresentation of scientific studies.
- Lack of credible references or citations.
- Cherry-picked data (only showing evidence that supports one view).
- Conspiracy theories or distrust in all mainstream medicine without strong evidence.
